

Hula Op

This playful and innovative barstool has a captivating design ideal for discos, hotels and restaurants: the Hula Op barstool means ergonomics and functionality transformed into an unbelievable plump, curvaceous plastic cylinder.

Being such an inventive object, it rose applause and immediate success wherever when presented in the various exhibitions around Europe (Promosedia 2007, Italy; Horeca 2007, Athens Greece; Mia 2007, Rimini Italy; Fuorisalone in Milan's Exhibition in 2008).

The designer Raba Rainer has really had a winning intuition.

Technically speaking, top technology is used to create the Hula Op: the barstool is made in rotational molded polyethylene available in red, orange, white, black, green, fuchsia and grey, all UV stabilized for outdoor use.

The footrest is a chromed steel circular tube and the joyful cylinder, vaguely reminding Salvador Dali's oozing figures, happier rather than sad, leans on a round chromed steel base.

Where to set it? wherever you crave to have and display it, best places would be fashion bars, discotheques where its wavy body invites to dance, fashioned shops and stores, hotel and restaurant lounge areas, bars and restaurants with al fresco terraces.. there are no limits or boundaries, just unleash your fantasy.

The Hula Op barstool can be ordered in minimum 10 pieces also directly from individuals, with a lead time of average 1 month from order confirmation.

Sizes in cm.: H.82 W.50 D.32,5 - total depth 40
