

Mixo B1004

Ideal for the community situations like the company or school canteens the monobloc table Mixo 102 B1004 is an object made to last.

The frame is in thermosetting powders coated steel tube, the ergonomic seats are polypropylene shells mounted on die cast aluminum supports and can rotate at 360°. Total comfort and definitely reduced noise in the canteen because the chairs won't be dragged on the floor, furthermore the cleaning operations are facilitated thanks to the reduced overall size and number of feet in touch with the floor.

Belca proposes the table tops in melamine with black PVC edge, the color combinations space from the

standard sand beige or white to one of the options available on the catalog. The edges can be in solid or multilayer wood of various essence.

To be noticed the typical construction in curved steel tube that gives a touch of modernity to a piece whose best feature is the solid functionality.

On demand, you can have class 1M fire-retardant table top and shells and waterproof laminate for the top.

The assembling instructions come along with the piece that can be ready for shipment after 30 days from order with no minimum purchase quantity. The Mixo B1004 table needs only 4 assembling and 4 fixing bolts to be ready for use.

The Mixo B1004 table is H75, W140, D130, the seats are H 45 and D 50.
