

Limonite

Absolutely versatile wooden chair, Limonite chair is a classic, nearly accent chair in version with or without arms, which showed its versatility since its birth and presentation at Milan Furniture Exhibition in 2002.

In fact, Limonite frame in first class solid wood is available in manifold essences such as beech, ash, oak, cherry stained natural, bleached, regency or black aniline lacquer, while the seat is in padded foam (fire proof CAL 116 / CAL 117 according to British standards), covered in differently coloured fabric or leather.

The lower part of the back can also be padded and upholstered like the seat or

left open for a lighter effect.

The inspiration suggests to set it in high class restaurants or cafés, in hotel or even private dining rooms, and why not in conference rooms of distinct companies or refined beauty centers, in one word in luxury environments in search of an expression of style.

Extremely customizable, Limonite chair is available in barstool or low stool height, with seat and back completely covered in leather or fabric, on demand with customer's fabric. Please note the tapered legs and the lightness and elegance in the structure and the excellent quality.

Dimensions in cm are H94 W46 D44, seat height 47, weight 6,5 kg, boxed in 2 pieces which is also the minimum quantity for an order.
