

## AI

AI is a minimalistic coffee table created by Nao-Lin designer. Presented during 2006 Furniture Exhibition in Milan, this minimal low table cannot pass unnoticed with its polished reflecting surface shining its linear and essential beauty.

The AI coffee table can be a flawless furnishing complement for a contemporary residential living room, for unconventional waiting areas of offices or hotels. Fashion and music clubs are other suitable environments. Obviously its perfect collocation is modern furnishing, but AI can be a strong element also in classical or ethnic rooms.

With its brushed and polished die cast aluminium surfaces you can set the AI low table in almost any interior, as the reflections it returns will emphasize the surrounding pieces like a mirror. Spotless in combination with the square pouf version in the same collection, which can also be used as sidetable or bedside.

Dimensions are H28 W100 D100 cm. A considerable weight of 31 kg may seem too much for a coffee table, but the beauty of the AI low table consists also in its ponderous mass.

There is no minimum purchase quantity required. Standard delivery times are 30 days from the order.
