

Brillant chair

Brilliant cut in the design and in the shape, the Brillant chair has a clear or transparent colored polycarbonate shell resembling a precious stone with its multifaceted seat reflecting the light.

Designed by Robby and Francesca Cantarutti in 2007 it has been introduced in the Promosedia Exhibition in Udine (IT) with a remarkable buzz. The manufacturer foresees many versions in the frame, in fact you can have it with four rectangular or round tube legs that can be chromed or epoxy white or black painted, in a steel rod sled frame version and also with 5-wheel castors to be a desk chair either at home or in office.

The four-legged variant is also stackable. Although the sharpened lines, the Brillant fashion chair remains a comfortable seat and its many colors suit any interior such as dining rooms in up-to-date hotels, in glamour bars and eateries or in private homes; adapt for waiting areas and for conference rooms especially in the stacking option, it lightens any of the designated interior with its modern allure.

The shell of the Brillant chair is also available in colored non transparent polypropylene.

Ready for shipment in 3 weeks from order, it is delivered disassembled and the four legged version requires a minimum purchase of two pieces.

The chair in sleigh or four-legs frame is H80,5 - W60 - D59.
