

## Helix Eli-bb

Designed by Roberto Romanello Eli-bb leather chair stands firmly in the world of elegant furniture with its mighty and international line.

After it has been presented in Orgatech Exhibition in Köln in 2002, it raised the interest of the people from famous Holland America Cruise line, who immediately chose this chair to be a part of their crew in many ships from their renowned cruise fleet.

Eli-bb leather chair stands on a shiny or sateen chromed swivelling round base. The shell and arms are in solid wood and plywood padded in differently thick fireproof polyurethane foam all upholstered with polyester fiber.

The covering can be in fabric and/or in leather, even supplied by the customer. Besides cruise ships, frankly difficult to dispose of, more easily it can be set in hotel receptions, in modern dining rooms or restaurants declined in one of the innumerable upholstery combinations to match the surrounding environment.

For individuals: Mohdo sells also directly so it is possible to ask quotations or information, there is no minimum stock order to respect. The chair comes assembled individually packed after 40 to 60 days from purchase order.

Dimensions are H81 W57 D53, seat height and depth are 48 and 41 cm.
