

# Palm cantilever

Designed by Studio Diplomat, Palm cantilever chair has a cold foamed fireproof polyurethane padding on the internal steel shell supported by a chromed cantilever structure. It has been presented in 2007 Milan's Furniture Exhibition by Armet, where it rose big success together with the rest of Palm collection.

The captivating design and the ample choice of leather or fabric upholsteries are a strong point of this multipurpose chair. We would ideally collocate it in waiting areas, in offices as guest chairs or as meeting room chairs, in modern

hotel waiting areas or dining corners either in private homes or public places.

Slender and elegant, Palm cantilever chair can perform any of the said roles maintaining the class of a high-end piece. We would take the manufacturer's suggestion to match it with the table Voilà or Hook to furnish impeccably any dining room.

Armet delivers Palm cantilever shell and structure together with assembling set and easy-to-follow instructions.

Dimensions of the chair in cm. are H87 W64 D66 seat height 45, lead time is normally 4 weeks from order without minimum purchase quantity.
