

Splendor mirror

The beauty of the natural materials are literally reflected in the Splendor mirror, made with mother-of-pearls inserts on the wooden fiber frame on a superb design of Nao-Lin.

The dimensions allow to collocate this rectangular standing mirror in the interior that best suits your taste, because the delicacy and the elegance are welcomed anywhere. In addition, the purpose of mirror is of course reflecting but in the interior desing the mirror is another window or another door that enlarges optically the space, cpapturing the light and re-leading it all around.

Therefore perfect for the living rooms, for the entrance, for the bedroom in private homes as well as in luxury hotels and entrances of modern restaurant and bars.

The maintenance is easily carried, once carefully set in the position, with a feather duster to avoid spoiling the mother of pearl decorations. The mirror is quite heavy, therefore stale, in fact it weighs a good 50 kg, it measures H200 W 100 cm and can be shipped in about 30 days from order confirmation without quantity restrictions.
