

Hop SS

At 2006 Milan's furniture Exhibition Hanno Giesler and Colico Design introduced Hop SS barstool, akin of Hop chair and realized in the same path of innovation through simplicity and usability: a round steel base with contrasting square footrest and post with lift up mechanism; the post is hinged to a methacrylate seat in various colours, transparent clear, red, orange, brown, shiny white and black, and also a clear version with fancy damask flowers etched in white.

The natural matching of Hop ss barstool is of course with Hop chair and the vast colour choice makes it difficult to go for one or another.

Hop shell has a comfortable handle in the medium low back that recalls the shape of Hop chairs and features the same sandglass indented shape, shrinking in the bottom of the back just before the seat.

The natural collocation of Hop SS barstool is a fashion bar or the counter of a fashion restaurant, but can also be set in a young waiting area like in shops or design studies.

Private purchase is also possible with Colico design, there is no minimum stock order and the lead time is about 3 weeks. Packing is by 2 pieces.

Dimensions in cm. of Hop SS barstool are: H 103,5 W 40 D 41 seat height 80 (adjustable)
