

Haiti

The Haiti table represents the unique style of the designer Hanno Giesler for eXde by Cattaneo. The company successfully presented this element at the 2008 Milano International Furniture Fair.

Perfect to suit each space demanding for elegance, refined style and simple beauty, the Haiti table, thanks to its smooth lines and transparent unique top, is a precious piece for the hall of a fashion restaurant or design hotel, as much as for the entrance of an exclusive boutique or trendy store. Furthermore, thanks to its strong legs and large top, it is a practical solution for your home office or downtown private studio or meeting room.

Try to match this table with other items from the eXde collection and the result will be astonishing. The Elixir small chair or the Mademoiselle chair are just examples that go for a beautiful dining set.

The Haiti table frame is polished or satin chromed steel supporting a tempered glass top. H74 x W200 x D105 cm are standard dimensions for this item.

The table is delivered to the customer in about 2 weeks from order ready to be assembled and with special instruction for the legs assembling. No minimum purchase requested by the company.
