

Rich

Present at the 2008 Edition of Promosedia in Udine, the Rich chair with arms is a glamorous piece combining multiple features. Designed by Riccardo Rivoli for his ILS collection, it unites the practicality and the modern lines to sophisticated technology (the laser-cut legs) and comfort.

The Rich chair can really count on its values: a comfortable seat/shell padded in fire-resistant cold foamed polyurethane is completely upholstered in one of the innumerable covers offered by the manufacturer (see the pictures: zebra-stripes or tweed are just two very playful and pleasant examples from ILS collections palette). The frame may be chrome or sateen chrome steel, on

demand lacquered in aluminum color.

Very light in weight and in maneuverability, the Rich chair with arms is ideal as guest office chair or meeting room chair if you need it in your office, but it looks great also in dining rooms at home or in public locations, as well as in bars and coffee bars. Although lightweight the Rich chair ensures solidity and sturdiness.

The manufacturer suggests combination to the Diamante extendable table for a perfect match. No minimum purchase requirement for the Rich chair, which will be ready for shipment about 30 days from order confirmation.
