

Comfort France

Caloi are leader in the production of seating systems for cinemas, theatres and conference halls, and the Comfort France seating system is a clear example of their skills.

The bearing structure is epoxy lacquered wiredrawn steel, padded in contoured Freon-free polyurethane at different density on seat and back, whose structure is in multilayer beechwood. the fire-proof upholstery is available in fabric, eco-leather or velvet. All seats are provided with glass-holder and numbered one by one and by rows, either with metal plaques, or

embroidered on the fabric, or with stickers. The seats do not recline and every single piece is supplied with a fixing base.

Essential for the safety and the reliability of the public locations where the comfort France seats are places,

the seats have been CATAS tested and certified as follows: static load on seat and back EN 12727/00 - static horizontal load on backrest EN 12727/00 - vertical static load on backrest EN 12727/00 - horizontal static load on armrests EN 12727/00 - vertical static load on armrests EN 12727/00 - seat shock resistance EN 12727/00 - backrest shock resistance EN 12727/00 - armrest shock resistance EN 12727/00 - seat and backrest weariness resistance EN 12727/00 - front side seat resistance EN 12727/00 - horizontal seat resistance EN 12727/00.

therefore, in any cinema, multiplex or simply in a hotel movie hall, the Comfort France will be a safe choice.

Minimum purchase required is 50 pieces, normally ready for being shipped disassembled in 60 days from the order confirmation.

Dimensions of the single armchair are, in cm: H100, W56 to 60, D82; seat: H41 W54 D58
