

Abako

Designed By Antonio Morello for DVO Della Valentina Office, Abako is a reception furnishing system made of tops and joints to be composed in the most varied ways to come towards the customers' needs.

Technically unexceptionable, it has vertical panels in MDF with visible surface in aluminum and plastic horizontal profiles, the tops are in 12 mm thick frosted tempered glass with shiny edges, the worktops are in 25mm thick MDF panels covered with grey, maple or dark cherry melamine and ABS edges.

The worktops are equipped for cable hosting, the straight tops L.90 cm and the curved tops with 60° angle have an

elliptic hole in the top, the joint tops with 90° angles have the middle and side leg in metal tube shaped to host the cables.

The edges are covered with a continuous PVC edge in aluminum colour, the handles are in metal sheet painted aluminum.

The whole Abako range is certified on the strictest European and world quality and safety standards: fireproof, catas, iso 9001, iso 14001, Emas environmental certificate.

All the metal parts are epoxy powder coated.

Abako is supplied with clear assembling instructions and a list of the tools to be used for proper assembling.

The suggested combinations are multiple, for maple version the elements can be chosen among the Bull1, Quattro, Exit, Quicker, lks 25, Entity, Dak or Vertigo; for the light grey version there are other options, for example Treko, Quattro 30 and Exit 30, Bull 4 and Quicker 4, lks. The dark cherry version fits at best with Kim, Palm or On.

To clean the surfaces it is highly recommended to use a soft damp cloth without chemicals or abrasive detergents and to rinse very well afterwards.

Abako is the perfect choice for the modern reception as it is finished on all sides and can be put in the middle of the hall in any situation where it can give its unique look of modernity and efficiency.

Abako is perfect for any reception in hotels, offices, hospitals, schools, colleges, universities and other institutions, as the versatility and the top high quality allow to meet any requirement and standard.
