

313 - Neon

Intriguing beauty, simple lines and easy style are combined together in the Neon chair.

The easy design of the Neon chair make it suitable for the most different indoor and outdoor locations: from the waiting areas of malls, shops or airports; to the business environment of meeting and conference rooms or educational and health institutions; to the privacy of your home.

Furthermore, the strength of its materials make it the ideal chair to décor any outdoor ambient: from the terrace of restaurants, bars or discotheques; to the patio of hotels, resorts, or motels; to the relaxing atmosphere of your own garden.

This plastic chair from the O&G collection is completely made in polypropylene, that is a very reliable and practical material because of its resistance to any weather conditions, being the heat and the UV rays of summer days, or the rain and the humidity of autumn nights.

To make the Neon chair even more stylish you may choose among several brilliant and unique colours, as for example a snow-white or a raspberry-red colour.

The Neon chair is stackable up to 10 pieces from the floor.

If not currently available in stock, it will take about 4 weeks to have this chair delivered in a two-piece cardboard-box (2 is the minimum quantity O&G request for the order).
Size of the single chair is H88 x L54 x W52,50 and seat H46 cm.
